

GASEZ SDG Model Zone initiative

2023-2024

Background of GASEZ

The Global Alliance of Special Economic Zones (GASEZ) is dedicated to advance a new generation of special economic zones (SEZs) for sustainable development. The alliance was launched in Montego Bay, Jamaica, in 2022 by the Africa Economic Zones Organization (AEZO), the Free Trade Zones Association of the Americas (AZFA), the Green Partnership for Industrial Parks of China (GPIPC), the International Association of Science Parks and Areas of Innovation (IASP), the National Association of Foreign-Trade Zones (NAFTZ), the United Nations Conference on Trade and Development (UNCTAD), the World Free and Special Economic Zones Federation (FEMOZA), and the World Free Zones Organization (World FZO).

The SDG Model Zone Initiative

The United Nation's SDG Summit in September 2023 called for immediate measures to scale up efforts to achieve the 2030 Agenda, including through SDG investments. In line with this aspiration and GASEZ objectives, the Alliance launched its SDG Model Zone initiative on 18 October 2023 during the UNCTAD World Investment Forum in Abu Dhabi. The GASEZ founding members have jointly identified 50 SEZs from across the world that are nominees for SDG model zones. The criteria used to select the SEZs nominees for SDG Model Zones were derived from UNCTAD's World Investment Report 2019. These criteria are: (i) Commitment to sustainable development; (ii) promotion of investment in the SDGs; (iii) levels of social, environmental and governance standards and compliance; and linkages and spillovers.

The GASEZ SDG Model Zone initiative seeks to achieve 3 main objectives:

- 1) Raise awareness of the contributions of SEZs to sustainable development;
- 2) Recognize the efforts of zones that are leading the way in this space;
- 3) Share elements of best practices by SEZs that can serve as an inspiration and be replicable by other zones.
